

IMI Accreditation. Light Vehicle Inspection

NEED TO KNOW

This is not a training course and contains no technical training delivery in either the classroom or workshop. This is an **assessment** of existing knowledge and competency in this area. Delegates must bring appropriate PPE with them (boots & overalls).

TARGET GROUP

- 1) Technicians who already have a good working knowledge of automotive technology and inspection procedures. Ideally to a Level 2/3 standard.
- 2) Technicians who have a need to prove competence in the inspection and diagnostic principles of motor vehicles systems.

ASSESSMENT DURATION

1 day (8 hours contact)

ASSESSMENT CONTENT

IMI Qualification ref: IMIA-ATA- LVIN-3-12

Technicians must pass 2 theory tests and 5 assessments of their practical skills (listed below):

- Emission system • Electrical systems • Braking systems • Steering & suspension systems • Vehicle structure / Vehicle appraisal

DETAILED DESCRIPTOR

Introduction to assessment staff.

Explanation of the expectations and running order for the day.

Explanation of the assessment criteria and procedures.

Lunch, tea/coffee and biscuits at appropriate times.

Online underpinning knowledge assessments.

Practical workshop competence assessments

Discussions, summary and conclusions

Feedback from the assessment

Where applicable, accreditation photo card and certificate will be issued to those who meet the required standard during assessment (issued by post after the event). Successful completion will result in inclusion on the IMI Professional Register unless requested otherwise.
